

Oilfield Mechanic

-  **Location: RedDeer, Alberta**
-  **Full-Time | Shop & Field Work | Overtime Available**

About the Role

We're looking for a skilled and reliable Oilfield Mechanic to join our maintenance team. This role involves both shop and field work, performing repairs, inspections, and preventative maintenance on a variety of oilfield equipment. If you have strong mechanical skills and take pride in safe, quality work — we want to hear from you.

Responsibilities

- Diagnose, repair, and maintain oilfield service equipment (engines, hydraulics, trailers, accumulators, swivels, etc.)
- Perform preventative maintenance and inspections according to company and regulatory standards
- Respond to field breakdowns and complete on-site repairs when required
- Complete service reports, inspection forms, and maintenance logs accurately
- Maintain a clean and organized work area and follow all safety procedures

Qualifications

- Journeyman or Apprentice Heavy-Duty Mechanic, Millwright, or equivalent experience
- 5+ years of oilfield or heavy equipment experience preferred
- Strong knowledge of hydraulic and mechanical systems
- Valid Class 5 driver's license
- Current H2S Alive, First Aid, and WHMIS certifications (or ability to obtain)
- Must be able to work independently and in field conditions when required

What We Offer

-  **Competitive wages + overtime pay**
-  **Comprehensive benefits package**
-  **Positive team environment with a strong safety culture**

How to Apply:

Submit your resume through Indeed or send directly to hr@haes.ca with the subject line "Oilfield Mechanic – [Your Name]".
